

Dunblane & Stirling Beekeepers' Association

Directions to our Apiary at Stirling University

Stirling University is located on the A9 between Bridge of Allan and Causewayhead, Stirling. On entering the University grounds take the first road on the left which is signposted for the Pathfoot Building. Continue on this road for about half a mile, passing the student residences and then the original estate house, Airthrey Castle on your right with a putting green on your left. Continue past Airthrey Castle as the road bears first left then right passing a small car park on your left and the Sports Pavilion on your right.

Immediately after the Sports Pavilion turn left and enter the area of rough ground next to our Cabin which is painted green.

Apiary Hygiene – Please Note

It is very important when visiting any apiary that you observe good apiary hygiene.

Bee-suits should have been freshly laundered. It is advisable to bring a black polythene bag to put your bee-suit into after the apiary visit which will remind you to wash it before using in your own apiary.

Please clean your wellingtons before coming to the visit. A foot bath of washing soda solution will be provided as you enter and leave the apiary.

Disposable nitrile long cuff gloves are provided by the Association for you to wear during your visit and should be disposed of in the bins provided. Leather gauntlets or other hand wear may not be used when inspecting or manipulating Association colonies.

All hive tools will be provided and will be disinfected in washing soda solution between hives and after the visit. Please do not bring any hive tools, cover cloths, smokers etc.
